

**CS 301 (Barsky/Clancy)
Fall 2008**

Homework 3

Prepare for next week's meeting a plan for the section you'll be running during the week of October 13-17. If you're running a lab, anticipate the topics or techniques that will cause students trouble, and prepare ways to address those student problems.

In our October 10 meeting, we will review each other's plans. Bring three copies of your plan to class. Come to class on October 17 prepared to report on how it went, how the students reacted, and what you did to determine what students learned from the session.
